Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to an apparatus for spectral gain flattening or equalization for an optical amplifier, classified in class 359, subclass 337.1.
 - II. Claim 6, drawn to a method of determining a communication parameter in a WDM system (channel number), classified in class 398, subclass 34.
 - III. Claims 7-8, drawn to a method of determining a fiber characteristic in a photo-amplifying apparatus, classified in class 398, subclass 37.
2. Inventions II and I are related as process and apparatus for its practice, respectively. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, a materially different apparatus can practice the process as claimed. In particular, channel count can be determined at points outside of the photo-amplifying apparatus.
3. Inventions III and I are related as process and apparatus for its practice, respectively. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, a materially different apparatus can

practice the process as claimed. In particular, fiber attenuation can be determined in an optical amplifier without a control unit.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to H.J. Staas on 8/19/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
